G. & R. Summer Grown, Winter Rested, Own Root Roses

Very few persons even in the trade, realize to what mammoth proportions the own root Rose business has reached in the past few years. Our business has grown by leaps and bounds, and the end is not yet. It's easy to understand why. Because G. & R. own root Roses give satisfaction. They grow and bloom; they work year in and year out; they have permanency. Not so the budded Roses that are like "a flash in the pan" and gone. No wonder when the customers know about budded Roses they absolutely refuse to purchase and no one blames them. Give your customers the best, and the best are G. & R. own root Roses.

The Largest Rose Growers in the World

Although our stock of Roses for 1918 was several hundred thousand more than we ever grew, still we sold out early in the season and were compelled to turn down orders for three-quarters of a million Roses we could not supply.

One of our customers in Oregon says: "Several years ago we bought your Roses, then we made the attempt to grow them ourselves, then again we tried the California-grown Roses, but we are back with you and we are back to stay. No Roses do so well with us as the G. & R. Roses. We expect to plant more largely of your Roses each year." This is why G. & R. Roses are finding a ready market everywhere they are tried.

Rose After-Satisfaction

When you buy G. & R. Roses you get along with them the after-satisfaction—that sense of realizing all the success that should come from planting quality Roses, the knowing that no better results are possible to be obtained outside of G. & R. Roses. It is the after-satisfaction that has compelled us to plan to grow for the coming season one million additional Roses. Think of it, the after-satisfaction of selling six million Roses, and demanding a million increase in one year. Going some! you say. Yes, but are you getting your share of this Rose after-satisfaction? If not, why not? Plant G. & R. quality Roses. None better, none so good.

HYBRID TEA ROSES

New Varieties and a Few that are Scarce

This is a class of recent creation, embodying the delicate shades and peculiar fragrance possessed by the Tea Roses combined with the vigor and more pronounced pink and crimson shades of color previously confined to the Hybrid Perpetual class. In our opinion the Hybrid Teas will supersede all others because of their superior constitution and marvelously free-flowering qualities. In a sentence, it may be said they combine all the better traits of the two classes from which they sprang, altogether a great advantage. Almost all are highly perfumed, an attribute absolutely essential to a perfect Rose. They are ever-bloomers and hardy in all but the most rigorous climate.

COLUMBIA (Hill, 1918)—It is a big Rose, the open flower measuring six inches across. The color is a true pink, about the shade of a perfect Shawyer, deepening as it opens to glowing-pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached and this color is enduring; a great Rose.

CORNELIA (Scott, 1920)—Ophelia X Mrs. Aaron Ward. A splendid cross between these two well known Roses. Flowers are medium to large size and very double. The bud is a beautiful salmon pink. In the half expanded and full flowers the outer petals are light flesh, with the center a bright Malmalson pink; base of petals bright orange. A strong, vigorous grower with good stem and foliage.

CRUSADER (Montgomery, 1920)—A big, strong growing variety, robust and rugged in every characteristic; the growth is heavy and the flower stems strong and heavy. It is free flowering, and the blooms are big and double, and in color a rich velvety crimson. A free flowering red Rose that is a wonder.

CRIMSON CHATENAY—This is the Crimson Chate-nay, a great Rose. All know the Mme. Abel Chate-nay. Well, this is a crimson form with all the other good qualities of its parent.

CRIMSON QUEEN—Strong, upright grower, flowers large and full. Color a rich bright velvety crimson. A grand garden Rose, as it is always in bloom.

COUNTESS CLANWILLIAM (Hugh Dickson, 1914)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.

FLORENCE FORRESTER (McGredy, 1914)—Clear snow-white with a lemon tinge; as the flowers age, they become a pure white, the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society.

FRANCIS SCOTT KEY (Cook, 1914)—An American seedling, raised by John Cook. It is a heavy double Rose of great substance. In color, red. It shows good growing characteristics and is undoubtedly a valuable variety. Throughout the summer this Rose was unequalled as a cut Rose and it is proving equally good in midwinter to be an excellent grower, opening perfectly and worthy of unqualified recommendation.

FRANK W. DUNLAP (Dunlap 1920)—Did you see it at the International Flower Show at New York the past spring? Its record at the exhibition was: Winning silver medal for the best new pink Rose and gold medal sweepstakes for the best seedling in the show. Frank W. Dunlap was the finest flower in the exhibition. Claimed to be better than Mrs. Charles Russell.

HYBRID TEA ROSES—Continued

GLADYS HOLLAND (McGredy, 1918)—Of magnificent form and size. Color buff, shaded orange-yellow, outside of petals pearly-peach. Very free flowering. Awarded a gold medal, National Rose Society of England.

GLOIRE DES BELGES (Chambard, 1916)—Growth vigorous and free, flowering continuously until late in the season. Buds oval, long and of elegant form with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.

GOLDEN SPRAY (Hugh Dickson, 1918)—Unique in habit and growth, it sending up long arching shoots which form great loose elegant sprays, every bud of which opens up in succession. The buds are very long, of deep Marechal Niel yellow, opening to almost single blooms of clear lemon-yellow. Awarded gold medal, National Rose Society of England.

GORGEOUS (Hugh Dickson, 1915)—Flowers large and full, exquisitely formed and produced in endless profusion. Deep orange-yellow and heavily veined with reddish-copper, the most charming and gorgeous coloring which has yet been introduced. The most striking Rose in existence. Gold medal, N. R. S.

HADLEY (Montgomery Co., 1914)—Hadley is a development from a line of seedlings raised by Alex-Montgomery, Jr., the varieties used in this development being Liberty, General McArthur and Richmond. In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.

HENRIETTA—One of the finest in existence for bedding, garden and cut-flower purposes; blooms erect on long stems; buds long and pointed. Color fiery orange-crimson, changing to soft coral-salmon. Very hardy. Free in habit.

HOOSIER BEAUTY (Dorner, 1915)—We use description of E. G. Hill Co.: "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. As soon as thoroughly established in the soil it sends out long, stiff growths with a bud on every shoot. It does not need to be pinched like Killarney or Richmond, but produces, naturally, stems two to three feet in length; each plant keeps up a very close succession of bloom, and again unlike Richmond it is a good summer Rose. It is a clean grower, shows very little inclination to 'spot' or mildew; indeed, the variety is quite clear of both. It is an easy doer, grows side by side with Richmond and Killarney; and has become instantly popular and in heavy demand in the four cities where blooms have been sold, flower buyers through the section calling for it by name. We are describing the Rose very fully in response to questions asked us by intending purchasers." We believe this Rose will make its mark as a garden variety.

KILLARNEY BRILLIANT—(Alex. Dickson, 1914)—The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.

LILLIAN MOORE (Hugh Dickson, 1917)—No Rose ever has been offered to the public with the same credentials, having won in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar-Trophy offered by the "Panama-Pacific Exposition" for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the exposition, Mr. Charles C. Moore. Color deep pure Indian-yellow with slightly deeper center; long buds; free bloomer. A gem.

Lillian Moore.

MADAME COLLETE MARTINET (Pernet Ducher, 1916)—A vigorous grower of coppery-orange color. The color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one.

MADAME MARCEL DELANNEY (Leenders, 1916)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mock, and honored with the award of the Gold Medal of the Magatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

MISS WILMOT (McGredy, 1917)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S.

MR. P. L. BAUDET—Color carmine-rose flecked with salmon-yellow, center darker. Flowers large and full, vigorous in growth, continuous in bloom. A unique two-tone Rose.

MRS. CHARLES BELL (Pierson, 1918)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink Radiance, and is a sport of that well known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

HYBRID TEA ROSES—Continued

MRS. BRYCE ALLAN (Alex. Dickson, 1916)—Strong Moss-rose perfume. Color carmine-rose. Flowers globular in form, very erect stems, deep green foliage.

MRS. HENRY WINNETT (Dunlap, 1918)—This is a seedling raised by John H. Dunlap, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest of all red or crimson varieties. Buds are long and well formed. A superb red Rose.

MRS. JOHN COOK (Cook, 1920)—White suffused with delicate pink, describes the color of this strong-growing, big-flowered daughter of Ophelia. The color varies with the season, the flush of pink being more pronounced during cool weather, while the Rose is almost white during the long days of bright sunshine. In bud it is nicely formed, the mature flower opening cup-shaped, but expanding fully to a large and finely formed bloom. It is a strong-growing plant on the bench, comes away quickly, and the growths are strong, making a big plant which is very prolific. To the grower who needs a white Rose who can overlook a flush of pink, and who fails with Double White Killarney, this new Rose will prove a boon. To the grower who grows White Killarney well, Mrs. John Cook may also be welcome. It is bigger and better in summer, and with its delicate pink in dark weather, is a very charming color.

MRS. MACKELLAR (Alex. Dickson, 1915)—The glorious blooms make this an imposing Rose. A deep citron or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly reflex and become pearly primrose-white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

NATIONAL EMBLEM (McGredy, 1915)—Dark crimson of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely and continuously.

PREMIER (Hill, 1919)—Already too well known to need description. A magnificent novelty in the class with Russell. Deep rose; fragrant; thornless; free.

PILGRIM (Montgomery, 1920)—In color a beautiful shade of bright rose-pink. The bud, which opens perfectly, is long and of ideal form. Pilgrim is a Rose of good substance and petalage, and at any stage of development is perfect in color and form of flower. Its pronounced tea fragrance will attract all Rose lovers. It is prolific and highly productive of first quality blooms. The stems are straight and strong, and there is no tendency to weaken at the neck. It takes water freely, and this quality makes it a good Rose for the store man, as it will keep when cut and retains its color and fragrance. It is the pink Rose to grow.

RED LETTER DAY (Alex. Dickson, 1914)—An exceedingly beautiful Rose of infinite grace and charm. Its velvety, brilliant, glowing scarlet-crimson buds and fully opened cactus-like flowers never fade, as the reflex of the petals is satiny crimson-scarlet. Awarded S. G. medal, N. R. S.

RED RADIANCE (Gude, 1916)—The Washington Red Radiance. A glowing crimson sport of Radiance with all the magnificent qualities of the parent; the enormous globular flowers on heavy canes are a sight to be long remembered. This variety will be in very heavy demand as soon as it is known. The color is dazzling crimson-scarlet. An improvement on the other Radiance sports that have appeared.

ROSE MARIE (Dorner, 1918)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon-red. Very desirable.

TIPPERARY (McGredy, 1917)—In color stands between Lady Hillingdon and Melody, showing an attractive shade of soft golden-yellow in the bud and half developed flower. Its freedom of flowering and its habit of growth will make it one of the most desirable Roses of its color.

W. C. GAUNT (Alex. Dickson, 1916)—Of medium size, with pointed buds, with naturally reflexed guard petals of brilliant velvety vermillion, tipped scarlet. Stems rigid, habit branching, large oval beech-green foliage. Rich tea fragrance; very rich in color.

EDWARD MAWLEY (McGredy & Son, 1911)—We have no hesitancy in saying that it is the finest of all dark Roses.

ETOILE DE FRANCE (Pernet Ducher, 1905)—Color a lovely shade of clear, red-crimson velvet; very fragrant.

FLORENCE PEMBERTON (Alex. Dickson, 1903)—Creamy-white, suffused pink; large, full, perfect in form.

F. R. PATZER (Alex. Dickson, 1909)—The color is creamy-buff, back of petals delicate warm pink.

TEA-SCENTED ROSES

New Varieties and a Few that are Scarce

The original blush Tea Scented Rose. A variation of the China Rose; was imported from China in 1810. In combination with the Yellow China, or Tea Rose introduced in 1824, it has been the origin of all the splendid varieties we now possess. Tea Roses are distinguished from others by the delightful fragrance of the flowers and by the delicate shades of yellow, nanken, salmon, copper, wanting in Hybrid Perpetuals. They bloom in great profusion during the entire summer and autumn, being especially fine during the autumn months. These are ever-bloomers; half hardy.

LADY PLYMOUTH (Alex. Dickson, 1914)—A most distinct and meritorious Rose of the "Souvenir de Pierre Notting" type, whose delicate pearly but deep ivory-cream petals are very faintly flushed, giving it a most piquant finish that is difficult to describe. It is delicately pure tea perfumed. Awarded gold medal, N. R. S., and silver medal, Crystal Palace, London.

MADAME BUTTERFLY (Hill, 1920)—This is Hill's glorified sport of Ophelia seen and admired by hundreds of florists the past spring. All the color tones of Ophelia are intensified making it a harmony of bright pink, apricot and gold. Ophelia ranks at the top in popularity and Madame Butterfly will surpass it. It averages more petals to

the bloom, it produces more bloom to the plant, because it makes more branches, everyone carrying a bud. The light buds are a lovely shade of Indian red, yellow at the base. They are unique for corsages and for low table decorations. The opening flowers are perfect in form and texture, clear and brilliant in color and of delicious fragrance.

MRS. CAMPBELL HALL (Alex. Dickson, 1914)—Delicate creamy-buff, edged or suffused rosy-carmine. The center of the bloom is warm cerise coral fawn. Deliciously fragrant. Awarded gold medal, N. R. S.

MURELLE—This is a yellow form of Maman Cochet, and is a grand yellow Rose. Be sure and try it.

TEA-SCENTED ROSES, Standard Varieties

ALEXANDER HILL GRAY (Alex. Dickson, 1911)—Its color is a solid deep yellow throughout. Gold medal, N. R. S.

BLUMENSCHMIDT (Schmidt, 1907)—Pure citron-yellow; outer petals edged tender rose. Winner of three first premiums.

BON SILENE (Hardy, 1835)—Color crimson-rose with sheen of silver. This is one of the old forcing Roses that has come into favor again.

BOURBON ROSES, Standard Varieties

A semi-double rose-colored variety; was imported from Mauritius to France in 1819 by M. Jacques. Attempts were made to improve this pretty but imperfect Rose, and a number of very beautiful varieties have been originated. They are more hardy than the Tea Scented Roses.

flowers in June, but continuing to bloom almost without intermission until the end of the season. A royal Rose; cannot be too highly recommended.

CLIMBING MAMAN COCHET—No Rose we grow is so popular as *Maman Cochet*. Here we have an exact counterpart of that popular variety, except that it is a vigorous climber. All will welcome this new Rose.

TENDER CLIMBING ROSES, Standard Varieties

GAINSBOROUGH (Good & Reese, 1903.)—(C. H. T.) A climbing form of *Viscountess Folkestone*. Its delicate coloring is difficult to describe, being elegantly tinged fawn, almost white and lustrous as satin. When in full bloom it resembles a large, fine, fluffy Peony, but without a suggestion of stiffness, often measuring eight to nine inches in diameter. An enthusiastic admirer from the state of Oregon describes it as a Rose reminding him of a beautiful girl wearing a light colored *Gainsborough* hat, ornamented with white ostrich plumes, hence the suggestion of its name.

POLYANTHA OR BABY RAMBLER ROSES

Standard Varieties, Including Hybrid Polyanthas. They are Hardy.

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through the summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay, and anyone who attempts to handle Roses without including this class will bump into something real hard. They are useful, either pot grown or for bedding purposes or for hedge effects. Completely hide the plant with bloom from early till late.

ANNA MULLER (Schmidt, 1907)—This Rose is very much the same as the Crimson Baby Rambler, except in the colors of its flowers, which are a shiny, brilliant pink.

BABY RAMBLER, or MADAME N. LEVAVASSEUR (Levavasseur, 1903)—This is the original Baby Rambler, daddy of them all. In bloom all the time. Flowers in large clusters of brightest crimson.

BABY TAUSENSCHOEN (Welter, 1911)—Its flowers are large and so much like "Tausendschoen." A bush form of "Climbing Tausendschoen" or "Thousand Beauties," having all the charms in the variable coloring in its flowers that its parent has.

CATHERINE ZEIMET, or WHITE BABY RAMBLER (Lambert, 1901)—Grows to a height of twenty inches and produces double pure white flowers in abundance.

CLOTHILDE SOUPERT (Soupert & Notting, 1890)—(H. Poly.) Known the world over as one of the very best of all bedding Roses. The only rival of "Hermosa" as a bedder and market pot plant. The color effect is beautiful ivory-white, shading towards the center to bright silvery-pink. Everybody's Rose.

ELLEN POULSON (Poulson, 1912)—Dark brilliant pink, large, full, sweetly scented. Most floriferous.

ERNA TESCHENDORFF (Teschendorff, 1911)—The flowers are of a deep crimson color, flushed with carmine, resembling the dazzling color of "Gruss an Teplitz." It is much sought after in America to bloom in pots during winter and for Easter time.

JESSIE (Merryweather, 1909)—The flowers, which are produced in huge clusters, are of a bright cherry-crimson color which does not fade.

LE PONCEAU (Hemeray-Aubert, 1910)—Dark red, blooms in large clusters. A choice variety.

MADMOISELLE CECILE BRUNNER (Ducher, 1880)—(H. Poly.) This is the popular Baby Pink or "Sweetheart" Rose. In the past year or two this Rose has fairly jumped into popularity. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds. Color blush, shaded light salmon-pink; distinct and desirable.

MRS. WILLIAM H. CUTBUSH (Levavasseur, 1907)—It produces in constant profusion throughout the entire summer its pleasing delicate pink blooms in large trusses.

ORLEANS (Levavasseur, 1910)—Showiest and prettiest of all Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink with distinct showy center of pure white; florets not crowded, but of beautiful arrangement and cannot be beaten. The color is irresistible. Plant grows like a weed and flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and has made a sensation. Awarded gold medal.

PERLE d'OR (Debreuil, 1883)—Nankeen-yellow with orange center; novel and beautiful. This Rose is dividing honors with "Mlle. Cecile Brunner" as a cut flower, being planted largely for this purpose.

POLYANTHA OR BABY RAMBLER ROSES, Newer Varieties

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.

BABY ECHO—A greatly improved Tausendschoen; about the same color, but with more substance.

EDITH CAVELL—Bright crimson; white eye; very beautiful.

ETOILE LUISANTE OR BABY HERRIOT—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), colored up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which on account of the

similarity in color has been known among the cut flower trade as Baby Herriot. Its color is a shrimp-pink with intense coppery-scarlet suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is of free growth and floriferous. We are certain that Baby Herriot will please everyone.

GRUSS AN AACHEN (Geduldig, 1909) (H. Poly.)—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

A bed of Edith Cavell, "The New Polyantha."

POLYANTHA OR BABY RAMBLER ROSES, Continued

GEORGE ELGER (Turbat & Co., 1913)—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

LE MARNE—Dwarf, perpetual flowering Polyantha. Semi-double flowers, bright salmon-rose at the edges, rosy-blush inside. Blooms abundantly and continuously in bouquets of fifteen to forty flowers. Has fine keeping qualities.

Mlle. FRANCISQUE FAVRE—Dwarf Polyantha. Robust in growth, quite continuous in bloom,

flowering in large trusses of single flowers. Color, velvety crimson, with large silver-white eye. Extremely showy.

PINK TAUSENDSCHOEN (Rosarie)—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.

TIP TOP, "Baby Doll" (Lambert, 1915)—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll-roses, a bench of "Baby Doll" being an even parterre of delicious color.

HYBRID PERPETUAL ROSES

Newer Varieties

The first Hybrid Perpetuals were grown from crosses between Hybrid China and Tea Scented Roses with Gallica and Bourbon Roses. This is a beautiful class and cannot be too highly recommended, including, as it does, many of the hardiest early and late flowering kinds and nearly all of the superb rich crimson, red and pink varieties which make such pleasing contrasts to the yellow and white Teas. These are hardy.

GEORGE DICKSON (Alex. Dickson, 1912)—As near as we can describe it, the color is a velvety black-crimson, the back of the petal being heavily veined with deep pure crimson-maroon. We have regularly had blooms of the highest exhibition standard quite five inches across. It has wonderful lasting qualities, not only as to the retention of its color, but also in its shape and freshness. Awarded the gold medal of the National Rose Society of England, besides many other first awards at various other shows in England and Ireland.

KING GEORGE V (Hugh Dickson, 1912)—The color is quite unique amongst Hybrid Teas, being rich blackish-crimson, with deep velvety violet flush, a striking and brilliant color, not burning in the sun nor turning blue, as so many of our very dark Roses do. It is very free flowering and perpetual and delights in a warm sun. The perfume is strong and very pleasing. Awarded the gold medal of the Festival of Empire, Crystal Palace, London, June 29, 1911. With us this Rose is a pure Hybrid Perpetual.

Color deep, bright, vivid, intense pink, with the penetrating fragrance of the old June Roses. We have grown this Rose for years, in sections of the country from Canada to the Gulf, and we have no hesitancy in saying after the most thorough and rigid test that a Rose can be put to that this Rose is in every respect just what we claim for it.

DUC DE ROHAN (Leveque, 1861)—Brilliant carmine, large and full; one of the very best Hybrids we have.

It is an extraordinarily strong grower, and has the vigor and hardiness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. The color is a marvelous white, without a tinge of yellow or any other shade. A true paper-white, the standard by which all white Roses are judged. We grow "White American Beauty" literally by hundreds of thousands.

GENERAL JACQUEMINOT (Roussel, 1853)—Crimson-scarlet; large, full. Very fragrant. Excellent.

GLOIRE LYONNAISE (Guillot, 1885)—Very large, full flowers. Color white, base of petals canary; Tea Rose perfume.

HIS MAJESTY (McGredy, 1908)—The crimson Frau Karl Druschki. Deep, dark crimson, shaded deep vermilion-crimson towards the edges. Awarded gold medal, N. R. S., 1908.

HUGH DICKSON (Hugh Dickson, 1904)—Color brilliant crimson shaded scarlet; large and fine form, opening well in all weathers. Very sweetly scented.

J. B. CLARK (Hugh Dickson, 1905)—The color is unique among Roses, being deep scarlet shaded blackish-crimson, with rich bloom like a plum; flowers are large and beautifully formed. Awarded the gold medal, N. R. S.

MADAME CHARLES WOOD (E. Verdier, 1861)—Bright cherry-red; extremely free bloomer: A grand garden Rose. This is the same Rose as Dinsmore.

ULRICH BRUNNER (Levet, 1881)—Cherry-red, of immense size, fine form and most effective in the garden.

HARDY CLIMBING ROSES, Newer Varieties

and a few that are scarce including the Ramblers, Cl. Polyanthas, Wichuraiana, Multifloras, Hybrid Noisettes, Setigera and Climbing Chinas

These Roses are suitable for planting where they can climb on walls, fences, galleries, porches, pillars, pergolas, arches, etc.; in fact, wherever a hardy climber is required. This list includes the Ramblers, Climbing Polyanthas, Wichuraianas, etc.

ALIDA LOVETT—Both buds and flowers are large; are of ideal form, are held on stiff stems a foot and a half to two feet long and the color is a lively bright shell-pink with shadings of rich sulphur at the base of petals—a combination that is both novel and beautiful. The flowers are of remarkable substance and long lived, whether cut or left to remain upon the plant, and are pleasantly perfumed. It is very much brighter than those of the justly popular Dr. Van Fleet Rose.

AMERICAN PILLAR (Conard, 1909)—(C. P.) A single flowering variety of great beauty, which appeals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten. They last in perfection a long time, and are followed by brilliant red hips or berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the autumn. A great Rose to grow in pots for Easter.

BESS LOVETT—Resembles Climbing American Beauty in shape of bloom, but is very much brighter in color and much more fragrant. The flowers are clear, bright red, of good size, and of double, full, cupped form, lasting a long time in good condition. Beautiful in bud and bloom and the most fragrant of the Climbing Roses. A vigorous grower and free bloomer. The large glossy foliage, like that of Silver Moon, greatly enhances the beauty of the flowers.

CLIMBING AMERICAN BEAUTY (Hoopes Brothers & Thomas, 1911)—(H. N.) A seedling from American Beauty with Wichuraiana and Tea blood in its veins. The introducers say of it: "Same color,

size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection." This Rose has already made its mark, and wherever it has been planted it has pleased, until today we sell it by the tens of thousands. You lose if you are slow to take hold of the "Climbing American Beauty." It grows and blooms.

CHRISTINE WRIGHT (Hoopes Bros. & Thomas, 1913)—(W.) A most exquisite new Rose, a cross between Caroline Testout and an unnamed seedling; it is of strong climbing habit, with large, heavy, dark green foliage, which is immune to disease. The flowers are double, from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud and in the fully expanded flower; in color a most refreshing bright wild-rose pink; it flowers profusely during June, and continues more or less throughout the season.

GOLDFINCH—This is the yellow-flowering "Tausendschoen." All know the good qualities of that superb variety. Well, this is a yellow form, and is attracting much attention and many favorable comments.

PAUL'S SCARLET CLIMBER (W. Paul & Son, 1917) (W.) Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful new climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit.

SHOWER OF GOLD (Paul & Son, 1910)—(W.) The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (Henderson, 1910)—(W.) Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

HARDY CLIMBING ROSES, Standard Varieties

AVIATEUR BLERIOT (Fauque, 1910)—Saffron-yellow, center golden-yellow; full and double, flowering in clusters.

BALTIMORE BELLE (Feast, 1843)—(S.) Blush white; in large clusters. A splendid hardy climber. An old favorite.

CLIMBING BABY RAMBLER, or MISS G. MESSMAN (Messman, 1911)—(C. P.) Everyone knows how Baby Rambler is always in bloom. This is simply a climbing form of Baby Rambler, embracing all its good qualities.

CRIMSON RAMBLER (Turner, 1893)—(C. P.) Bright crimson flowers produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches; also makes a fine attractive hedge. Awarded gold medal, N. R. S. A Rose for the masses.

DR. W. VAN FLEET (Henderson, 1910)—(W.) Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center.

LADY GAY (Walsh, 1903)—(W.) Flowers of a deep cherry pink, shading on the edge of the petals to a very delicate soft tone of pink.

MADAME ALFRED CARRIERE (Schwartz, 1879)—(H. N.) Pure white, suffused with yellow at base of petals; very free and very fragrant; fine for arches and pillars. In Oregon it grows to the roofs of two-story houses, covering the entire side or end of a large sized house, and simply a wilderness of blooms.

MARY WASHINGTON (Origin unknown)—(Mtf.) Pure white, perfectly double, in immense clusters; fine.

PAUL'S CARMINE PILLAR—Very early. The flowers are large and very showy, of a rich rosy-carmine with white eye.

PHILADELPHIA RAMBLER (Conard, 1902)—(C. P.) Glowing crimson; large clusters; fine.

PRAIRIE QUEEN (Feast, 1843)—(S.) The old standby red climber. It is so hardy that it delights in the climate of Alaska and Canada.

RED DOROTHY PERKINS, or EXCELSIA (Walsh, 1909)—(W.) It is a good deal to claim for a Rose, but we are within bounds when we describe Excelsa as a brilliant Crimson Rambler flower on glossy, varnished Wichuraiana foliage. The defects of Crimson Rambler are its unsightly foliage in unseasonable weather, and its detonation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-

scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers.

DOROTHY PERKINS (Perkins, 1902)—(W.) A most beautiful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented; quite first class. Another Rose for the masses.

EXCELSA—See Red Dorothy Perkins.

EMPRESS OF CHINA (Jackson, 1896)—(C. C.) Bright pink; in large clusters.

FLOWER OF FAIRFIELD (Ludorf, 1908)—(C. P.) A counterpart of Crimson Rambler in every respect, except that it shows ever-blooming tendencies, many new growths being terminated with a large cluster of flowers.

FORTUNE'S DOUBLE YELLOW, or BEAUTY OF GLAZENWOOD (Fortune, 1845)—(H. N.) Yellow, flaked with carmine. This is a great Rose in California, where it is seen at its best, although suited for general planting.

GARDENIA (Soupt & Notting, 1900)—(W.) Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

HIAWATHA (Walsh, 1905)—(W.) Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color it is brilliant, ruby-carmine, with a clear white eye and a mass of golden stamens.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (Schwartz, 1906)—(C. P.) The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring; will become as famous as Crimson Rambler or Dorothy Perkins.

VEILCHENBLAU, THE BLUE ROSE (Schmidt, 1909) (C. P.) This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

WHITE DOROTHY PERKINS (B. R. Cant, 1908)—(W.) It has been the cry of nurserymen for years for a white climber that would rank up with Crimson Rambler, and now we have the pleasure of offering this White Dorothy Perkins, that in every way is the equal, if not superior, to Crimson Rambler as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

YELLOW RAMBLER, or AGLAIA (Lambert, 1896)—(C. P.) Bright yellow changing to canary-yellow; produced in pyramidal clusters of fifty or more blooms.

MOSS ROSES

These are probably a sport of the Cabbage Rose. The origin of the double Moss Rose is left to conjecture. They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance. Perfectly hardy.

ELIZABETH ROWE (Rowe, 1866)—This is an old favorite with its large deep pink buds well mossed. A beauty.

HENRI MARTIN (Portner, 1863)—Large, full flower of deep red; well mossed; fragrant.

MOUSSELINE (Robert and Moreau, 1881)—Pure white flower, buds heavily and beautifully mossed.

PRINCESS ADELAIDE (Laffay, 1845)—Deep blush-pink with buds that are thoroughly mossed.

MISCELLANEOUS ROSES

Under this heading are listed all the Roses not embraced in the different families or types that we name in the preceding pages.

AMOENA, The Pink Flowering Cherokee Rose (Hockbridge, 1909).—(L.) The flowers are the same as the White Flowering Cherokee, except that the color is a glowing pink with a golden-yellow center. Resembles huge apple blossoms.

ARTHUR R. GOODWIN (Pernet Ducher, 1909).—(A. B.) This is a genuine "Pernetiana," and is perfectly hardy everywhere. The color is coppery orange-red, passing to salmon-pink as the flowers expand. A superb combination of color.

LAEVIGATA, the Single White Cherokee Rose (Lindley, 1820).—(L.) This is the famous Cherokee Rose so well known in California. Large, pure white flowers with center filled with golden-yellow anthers.

NEW CENTURY (Conard, 1891).—(R.) A grand Rose this is entirely hardy, bearing beautiful silvery-pink flowers in clusters. This Rose is in bloom all the time.

SIR THOMAS LIPTON (Conard, 1905).—(R.) The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant.

WHITE BANKSIA, or Lady Banks (Keer, 1807).—(L. B.) A vigorous grower, in California growing to the top of tall trees and completely enveloping the entire tree; small double, pure white flowers in clusters, with true violet fragrance. Indeed, if one were blindfolded, he could not detect the odor from Violets. Very desirable.

WICHURAIANA, or MEMORIAL ROSE (Dr. Wichura, of Japan, 1886).—(W.) It is difficult to conceive anything more appropriate, beautiful and enduring for covering graves and plots in cemeteries than the Hardy Memorial Rose. It creeps along the ground as closely as an Ivy. The flowers are produced in lavish profusion in July. They are single, pure white, with a golden-yellow disc, five to six inches in circumference. It is also immensely valuable as a Climbing Rose, covering arches, fences, etc.

YELLOW BANKSIA, or LADY BANKS (Damper, 1827).—(L. B.) Same as White Banksia, except color of bloom is sulphur-yellow. Has the same delicious Violet fragrance.

BEAUTIFUL FERNS

Successful Fern growing always hinges on whether your Ferns are clean from the white fly. Our Ferns are absolutely clean. The other fellow's are sometimes not, which we know to our sorrow. Better get Good & Reese clean Ferns—always good, always grow.

New Fern, Nephrolepis Liberty

In the past we have sent out four Ferns that have all stood the test, viz., Roosevelt, Teddy Junior, Goodii or Baby's Breath, Splendid or Big Four. We now offer Liberty, feeling sure that it will become as famous as any of the quartet. Liberty has a cast of blue that submerges the green; the fronds are finely cut and the outstanding qualifications of this variety are the fact that each pinna is crested or split, giving it a decided unique appearance. We feel sure this Fern will make a place for itself. Our claims for this Fern have been verified the past fall in the great number of repeat orders sent us after seeing it. It is the biggest make of them all. Dozen, \$2.00; hundred, \$12.00.

"Teddy Junior,"
the Wonderful New Fern.

Grand New Dwarf Fern, "Teddy Junior"

The Fern for Every Household

This is known to the trade as the greatest of all Nephrolepis. No Fern can equal it. See what a fine plant it makes. Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.

Nephrolepis John Wanamaker

"The Wanamaker Boston Fern"

A "sport" from Nephrolepis Scholzei, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Nephrolepis. Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.

"Big Four Fern."

John Wanamaker Fern.

Fronds of the "Roosevelt Fern."

Nephrolepis "Roosevelt"

The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants, a far greater number than was ever sold of a new Fern. Two and one-quarter inch pots, \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.

Nephrolepis Splendida

The Big Four Fern

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of the "Fish Tail." Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.

BEAUTIFUL FERNS—Continued

Nephrolepis Whitmanii**The Ostrich Plume Fern**

This is the well known fluffy leaved Fern; beautiful. **Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.**

Nephrolepis Whitmanii Compacta**The Parlor Fern**

This is a condensed form of the "Ostrich Plume Fern," which valuable characteristics added which are not evident in the parent—the pinnæ subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description. **Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.**

Nephrolepis Scholzei**The Crested Fern**

The fronds, like Scotti, stand erect, and with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow. **Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.**

**Ostrich Plume Fern.****Nephrolepis Bostoniensis****The Boston Fern**

A variety that needs no description. By many called the Fountain Fern, on account when grown into large plants it droops gracefully. **Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.**

Nephrolepis Exaltata**The Old Original Sword Fern**

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the Nephrolepis we offer sprung. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. **Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.**

**Boston Fern.**

Newport Fern Scottii.

Nephrolepis Scottii

The Newport Fern

It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.**

Nephrolepis Elegantissima

The Philadelphia Lace Fern.

This is a greatly improved Elegantissima, not running back nearly so much as the old form. **Dozen, \$1.00; hundred, \$7.00; thousand, \$65.00.**

Elegantissima
Philadelphia,
Lace Fern.

Nephrolepis Goodii

The Baby's Breath Fern

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. Nothing is daintier or more exquisite than well-grown specimens of any size. Our reputation for it that no Fern in existence can compare with Baby's Breath in fluffiness. **Two and one-quarter inch pots, \$1.25 per dozen; \$8.00 per hundred.**

LOVELINESS—As its name implies this variety produces flowers of distinction in daintiness and beauty. The color is of pale creamy tone, soft and delicate, with a roseate tinge in the center. No. 1, hundred, \$6.50; thousand, \$60.00. No. 2, hundred, \$5.50; thousand, \$50.00.

MAINE—A variety long looked for by both florist and amateur. Its color is pure white, not the faintest spot or blemish can be traced on petals, throat or the inside of the flower. When in full bloom the petals curl backward reminding us of the lovely form that characterizes the Easter lily. There are many flowers open at one time, and these blossoms correctly placed on the stem widely expanded tend to touch each other in the acme of blossoming, giving the impression as though this full row of snow-white cups were one long, pyramidal flower. It is a wonder. Each, \$3.50.

MAJESTIC—Here is an orange shade that is new. It is not the orange of Alice Tiplady, which is wonderful, but a shade that has a tinge of salmon in it; very difficult to describe but a grand, refined color. No. 1, each, \$1.00; dozen, \$10.00.

MARY FENNELL—One of the patricians of the garden. Beautiful light lavender flowers on a tall, slender spike, lower petals primrose-yellow with penciling of lavender, perfectly exquisite and distinct. Especially recommended. No. 1, hundred, \$8.00; thousand, \$75.00.

MASTER WIESTE—Large compact spike of dark violet shaded purple. No. 1, hundred, \$4.00; thousand, \$35.00. No. 2, hundred, \$3.00; thousand, \$25.00.

MAY—An old favorite. White, heavily striped and splashed pink. Fine for forcing. No. 1, hundred, \$5.00; thousand, \$40.00.

MEADOWVILLE—White with lilac throat, a very pretty white flowering Gladiolus. No. 1, hundred, \$3.50; thousand, \$30.00. No. 2, hundred, \$3.00; thousand, \$25.00.

MISS CHRISTINA TREUR—Sport of Halley. It has retained the earliness of this variety, but gives a soft rose colored flower. Its advantage over Willbruck is that it has not those yellow stripes on the lower petals, but is of one constant rose color. No. 1, each, \$5.00.

Good & Reese Co.'s Gladioli—Concluded

MRS. DR. NORTON—Very large and well open flowers well set on a tall and graceful spike, four to eight flowers in bloom at one time. Color, white, the edges suffused with soft La France pink. The three lower petals have a blotch of sulphur-yellow, stained at the base with fine specks of Tyrian-pink. Strong and vigorous grower and very free flowering. Highest awards wherever shown. No. 1, dozen, \$10.00; hundred, \$75.00.

***MRS. FRANCES KING**—Could we grow but a few varieties, Mrs. Frances King would be one of them. A most beautiful "Besnard shade" of flame-pink. Flowers of giant size on a spike growing four feet high with from eighteen to twenty flowers. Six to eight open at one time. Beautiful under artificial light. A magnificent variety. No. 1, hundred, \$3.00; thousand, \$25.00. No. 2, hundred, \$2.50; thousand, \$20.00.

***MRS. FRANK PENDLETON**—The new sensational beauty winner of awards and prizes everywhere. The petals show beautiful bright rose-pink on a pure white ground, contrasting in a most striking way with the deep rich velvety blood-red blotch on the lower petals. As showy as an orchid. The most perfect and delicate coloring is produced when the spikes are cut and carried indoors as soon as the first blossoms open. No grander variety in existence. Pansy Geranium MRS. LAYAL, A Wonderful Plant

(See illustration on page 19.)

This new and wonderful Pansy Geranium is of the easiest growth, dwarf in habit, and literally covered with flowers all the time; and as it requires little or no attention, it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary—light pink, white, dark purple, black, etc., almost rivaling the Pansy in uniqueness of flower. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. Price, \$1.50 per dozen; \$12.00 per hundred.

PELARGONIUMS, Lady Washington Geraniums

The grandest of all flowering plants; do not resemble the common Geraniums in any particular, neither in foliage nor flower; more beautiful in every way. We here offer six distinct sorts, every one entirely different in color and every one a beauty. The Lady Washington Geraniums are the handsomest of all flowers—once seen, never forgotten.

The Easter Greeting or Ever-Blooming Set

\$1.50 per dozen; \$10.00 per hundred.

EASTER GREETING—Planted out as a bedding plant it will bloom continually until late in the

fall. It will prove the forerunner of a new race of ever-blooming kinds, as it rivals the Orchids in beauty. This new species is the earliest of all Pelargoniums, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. Florets fiery amaranth-red, with five large, regular shaped spots. The first and only kind to bloom as well bedded out as in pots, and to do so all summer.

GARDENER'S JOY—The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half dwarf nature and very sturdy. On account of its rapid, luxuriant growth it is a very profitable market variety.

GLORY—This splendid novelty is quite remontant, florets and cluster very large; ground color, Cattleya-blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color, which is a rosy-pink. It is, if anything, even more free in bloom.

LIBERTY—A glorious flower of salmon-red, with large velvety, sharply defined blotches bordered with scarlet. Has all the good qualities of Easter Greeting, its parent, having gigantic trusses. Equally valuable as a pot plant or for bedding out.

PRINCE—Immensely large flowers, strongly crimped, of fine shade, with from six to ten petals; color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

THE NEW FRENCH HYDRANGEAS

MME. E. MOULLERE—This has been the favorite white variety in the New York market this year; free flowering of good size and form. Awarded silver medal at the National Flower Show at Boston last year. A great favorite with English growers, one London grower known to us handling over thirty thousand of this variety alone.

BEAUTIFUL CANNAS

Cannas are called the poor man's Orchid because one may possess a perfect riot of color in his yard or garden for the minimum of both outlay and labor. They grow rapidly and bloom luxuriantly throughout a long season, requiring merely ordinary hoeing and weeding, and they always respond to plenty of water. Soak the ground thoroughly. Planted in beds of any formal shape, in rows or in front of porches and foundation walls, their rich, tropical foliage and gaudy bloom will repay their care and the insignificant trouble of winter storage.

Novelties in Cannas and Those That Are Rare

PANAMA—An attractive rich orange-red, well-defined edge of bright golden-yellow. Flowers very

large, and the immense spread of the individual blooms coupled with its early free flowering habit makes this Canna noteworthy. \$1.00 per dozen; \$6.00 per hundred.

QUEEN HELEN, or YELLOW KING HUMBERT—Immense flowers that are as large as the Orchid-flowering Cannas. Color golden-yellow, evenly and distinctly spotted red. FLOWERING BEGONIAS

Price, two and one-quarter-inch pots, except where noted, \$1.00 per dozen; \$7.00 per hundred.

Begonias are fine to plant on the north side of the house or other building, or in front of porch where they get shade. The foliage as well as the flowers are extremely ornamental, some being spotted and veined to give a parti-colored effect that is quite striking. Begonias planted with Crotons give a wonderful foliage effect, and this is heightened with their lovely showy flowers.

ALBA PICTA—Long, pointed, slender leaves, thickly spotted with silvery-white. Foliage small and elegant.

ARGENTEA GUTTATA—It has purple-bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

CORALLINE LUCERNE, the Grand New Ever-blooming Begonia—This is the grandest of all flowering Begonias. A strong, vigorous grower, with stiff stems and upright habit. The green foliage is long and pointed, freely dotted with silvery-white. The flowers are borne in great clusters from 12 to 18 inches across, almost hiding the plant. The color is a beautiful, bright coral-red of a heavy waxen texture. This variety is one of the most prolific bloomers of all the large growing Begonias. Its freedom in blooming, the large, rich and showy foliage combined, make it an excellent decorative plant for the house or conservatory, and it should find its place in every collection. \$2.00 per dozen; \$15.00 per hundred.

MRS. PATTEN (The Red Chatelaine)—This is the freest flowering Begonia of all. Dark rosy red flowers. Fine for florists' pot plants. Always in bloom. \$1.75 per dozen; \$15.00 per hundred.

MARGUERITE—A pretty foliage Begonia with pinkish-white bloom.

PICTA ROSEA—A wonderfully free-growing Begonia of sterling worth and great beauty. The plant is very compact in growth, forming a dense, well-proportioned bush with rich green foliage, spotted with silver. The flower is a rosy-flesh color, shaded with a silvery-pink and enlivened with dense clusters of yellow anthers. One of the most wonderful flowering Begonias within our knowledge. It blooms continually.

RUBRA—The most widely known and probably the best of all Begonias. This variety is usually very scarce and in great demand. We have a fine stock of it. Dozen, \$1.50; hundred, \$10.00.

THURSTON—The under side of the leaves is a rich, purplish-red, the veins very prominent, while the face, or upper side, is a bronzy-green, shaded with crimson and olive, with a peculiar glossy metallic luster over all. Flowers rosy-white, in large clusters well above the foliage. The plant has a fine habit.

Brugmansia, or Angel's Trumpet

Here is a plant for the masses. It grows easily, blooms freely, and the flower is something to be proud of. The Brugmansia blooms indoors in winter and in the garden in summer. The plant has large, tropical leaves, with blooms eight inches long by six inches wide at the mouth, resembling a trumpet, hence the name, "Angel's Trumpet." Pure white in color and as fragrant as a Jasmine. \$3.00 per dozen; \$20.00 per hundred.

Coleus

Our stock of Coleus has never been equal to the demand, but this year we have a larger stock than any previous year, and we think we can meet the wants of our customers. COLEUS TRAILING QUEEN—This is without question the finest of all plants for boxes, baskets or vases; it droops and hangs down two feet or more, not one little vine, but a whole clump of them. The center of foliage is scarlet, then around that a chocolate border, and outer edge of leaf margined green. It is the showiest of all Coleus and all vines. Try it. 60 cents per dozen; \$4.00 per hundred.

COLEUS TRAILING BEAUTY (New)—The same as Trailing Queen in every respect except the color, this being green, yellow and white. A fine companion of Trailing Queen, and equally showy. Dozen, 60 cents; hundred, \$4.00.

The Wonderful Lemon Ponderosa

A Fine Pot Plant for Florists' Sales.

Nothing that has ever been brought to our notice in the plant line has caused half the commotion that this Wonderful Lemon has. It is the true ever-bearing variety. On a plant six feet high no less than eighty-nine of the ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and at the same time had fruit in all stages of development, from the size of a pea up to the ripe fruit, showing it to be a true ever-bearer. Fruit has been taken from this tree weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. It is not uncommon to make twelve lemon pies from one Lemon. We have the entire stock of this ponderous Lemon, and guarantee the trees to produce the same large fruit. No budding or grafting necessary. Ponderosa Lemon is sure to become popular when it is known. It fruits when quite small, and makes a lovely house plant. Everybody can grow his own Lemons; it will fruit freely each year. The color is a most intense crimson, so vivid as to dazzle the eye; superb.

COUNTRESS OF LONSDALE—For perfection of bloom, erectness of stem, abundance of flower, this variety has never yet been equaled. The Ever blooming Butterfly Bush

Buddleya Variabilis Magnifica (Butterfly Bush).

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties and this one was among them. We observed it carefully for a season and were charmed with its beauty, ease of culture and free flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly we notice that it is not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vying with it in brilliancy of color. This shrub from a young plant, set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitude it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubby border. **Pot grown. Dozen, \$1.00; hundred, \$6.00.**
